

		Model 1				Model 2			
		1	2	3	1	2	3	4	Total
Mathematical model development	Complete notation <i>All symbols used are defined. From one step to another, newly added symbols are only defined.</i>	0	1	2	2	2	1	1	40
	Complete and correct formulation <i>Mathematical formulations are well written. The variable set of every optimization model is defined. From one step to another, equations to be added/changed are explained only. If needed, equations are not repeated but their equation number is used.</i>	0	3	4	2	4	2	2	
	Complete description of the model <i>All the machine learning and optimization models are sufficiently explained.</i>	0	2	3	2	3	3	1	
Coding	Efficient coding <i>Codes are written elegantly with commands and functions, in a way that they can be easily used for a large-scale realistic case study.</i>	2	2	3	0	3	2	1	19
	Easy codes for others <i>There are comments throughout the codes and a helpful READ-ME file, making it straightforward for others to understand and run the code.</i>	1	1	1	0	1	1	1	
Results and discussions	Illustrations of “key” results <i>There is efficient illustration of results via figures and tables. The report successfully highlights key and insightful results.</i>	2	0	4	0	3	4	4	41
	Efficient discussion of results <i>There are thorough, non-trivial, and discussions with insightful analyses. The report draws concrete conclusions.</i>	2	0	7	0	3	6	6
